

# POP Display Pallets

## Build from the Ground up with Litco's Engineered Molded Wood™ Pallets

### ✓ Sleek and Modern Design

Seamless, one-piece construction provides a clean, uniform look with smooth surfaces, rounded corners, and tapered legs—adding sleek, retail-ready appeal.

### ✓ Nail-Free and Easy Handling

Lightweight and nail-free, these pallets reduce injury risk, protect products from puncture damage, and keep floors scratch-free.

### ✓ Standard and Compact Sizes

Litco pallets come in standard and compact sizes, including our 24" x 20" quarter pallet, perfect for end caps and tight spaces.

### ✓ Reliable Performance

Resists bending and flexing under pressure, supporting up to 2,500 lbs. dynamically and 7,500 lbs. statically.

### ✓ Export Ready

Sanitized at over 350°F, Litco pallets are ISPM-15 exempt and ready for global export without additional heat treatment or stamps.

### ✓ Insect-Free & Mold-Resistant

Our high-heat process eliminates termites, larvae and bacteria. With 86% less moisture than new wood pallets, they resist mold even in high humidity.

### ✓ Space-Saving

Nestable design allows up to 50 pallets to stack within 8 feet, optimizing storage in warehouses and on the sales floors.

### ✓ Certified Sustainable

Litco pallets are Cradle to Cradle® certified and USDA BioPreferred®. They support a circular economy and environmental responsibility.

**NAIL-FREE**  
Won't scratch floors
